## **THERMAGE - (THE MIRA LIFT, ALTERNATIVE TO A FACELIFT)**

**MEDICAL FIELD:** 1) Unlike organ transplants, patients who opt for the MIRA Procedure do not rely on availability of a compatible donor for operation. 2) The procedure, as it names indicate, is minimally invasive therefore is the safest and most reliable alternative up to date. 3) There is minimal downtime after the procedure and the cost is much more affordable to the patients. 4) If necessary, the patient can decide to repeat the procedure for further improvement on his or her condition. 5) No risk of scarring. **Cosmetic field:** 1) More natural appearance after the procedure compared to surgical alternatives. 2) Removes uneven pigmentation and reduces the appearance of scars. 3) No risk of scarring.

One Time \$380 series of 5 Times \$1500 series of 5 \$2800

## **RF REJUVENATION FACIAL**

Effects: Skin tightening, wrinkle reduction, anti-aging, and Cellulite reduction and remodeling. Cool RF wrinkle reduction system adopts unipolar RF technology. RF can penetrate epidermis and reach deep dermis. The frequency of RF motivates water molecules moving at high speed from which heat is produced and the temperature reaches 45-60°C. This leads to subsequent contraction of the collagen. Moreover, the thermal effect causes collagen re-growth, reconstruction, and expression. Meanwhile, it renovates old and damaged collagen; realize the immediate effect of skin tightening, long term wrinkle reduction and ease anti-aging. The thermal trauma causes the fatty tissues to release fatty acid and glycerin that are then transferred into liver to be eliminated; the thermal energy cause the capillary vessels dilation to accelerate the metabolization of released fatty acid, which result cellulite reduction and remodeling.
